10. Pam does not have _____ pencils on her desk.

D. Read the article. Choose the best answers to the questions.

Domestic Robots

What do they do?

Every day most people do jobs in the home and they usually have machines to help them. They use dishwashers to wash the dishes, washing machines to wash their clothes and ovens to cook their food. But today there are also some fantastic domestic robots to help us do things. The Housefriend Domestic Robot can open your curtains, turn on your lights, clean your rooms and cook dinner automatically. Another robot, the Helpbot, waters your plants and cleans your car. It can even paint your house!

E. Who do they help?

Many people think robots like these can be very good for old people – they can help them to remember to take their medicine, visit the doctor or cook their food. There are also robot dogs. They are great pets for people with very small houses! One Japanese robot can even teach you English. It can chat to you online and give you conversation practice. A lot of students use this online robot.

F. My robot

I've got a robot to clean my house but I am not happy with it. It's expensive but it doesn't work well. It doesn't clean the floor well and sometimes it stops and sits for hours. It often starts working in the middle of the night and wakes us all up. I want to buy a new robot one day

- 1 Most people use a lot of _____ to do all the jobs in the house.
